USC Norris Comprehensive Cancer Center
Keck Medicine of USC

UNIVERSITY OF HAWAI'I CANCER CENTER

POSTDOCTORAL FELLOWSHIPS

POST-DOCTORAL TRAINING IN INTEGRATIVE CANCER EPIDEMIOLOGY

Program

The University of Southern California (USC) Norris Comprehensive Cancer Center (NCCC) and the University of Hawaii Cancer Center (UHCC), both National Cancer Institute-designated Cancer Centers, are seeking applications for fellowships in "**Post-Doctoral Training in Integrative Cancer Epidemiology**". The training program is supported by the NIH/NCI under the T32 mechanism.

Trainees will experience the interdisciplinary nature of cancer research in our catchment area, i.e., California and the Pacific. The program utilizes a diverse portfolio of long-standing and new research initiatives investigating behavioral, lifestyle, cultural, environmental, genetic and omic risk factors in populations experiencing striking differences in cancer incidence and mortality. Research projects capitalize on the highly developed genetic, environmental, biomarker, biostatistics, and data science programs at USC and on the outstanding expertise in nutritional, lifestyle, behavioral, and molecular risk factors at UHCC.
Given that this postdoctoral fellowship is a bi-institutional training program, all postdoctoral fellows will be exposed to a wide range of innovative molecular and traditional epidemiological approaches. Given the locations, our program offers excellent opportunities for research addressing Latinos and African Americans (USC) as well as Native Hawaiians/Pacific Islanders and Asians (UHCC). Trainees are awarded a competitive salary, full benefits, and a research/educational/travel allowance.

Eligibility

Applicants should have a recent doctoral degree (e.g., PhD, DrPH, MD/MPH) in Epidemiology, Biostatistics, Behavioral Sciences, Nutrition, Computational Biology, or related disciplines in a regionally accredited U.S. university or foreign equivalent. U.S. citizenship or permanent residency is required. A 2-year commitment is expected and acceptance is based on availability of a suitable faculty mentor.

Application

Interested applicants should apply with a cover letter, Curriculum Vitae, 2-page statement of research interests and career goals, copies of all graduate school transcripts, and the names and contact information for three references. Please submit application documents using the following form: https://forms.gle/rLTumvXxer8LkrNS7
If you have questions about the Program please send inquires to the Team Members below.
